INFORMATION AND MANAGEMENT SUPPORT STAFF
WEEKLY REPORT FOR PERIOD ENDING 02 MAY 1984

1. Progress Report on Tasks Assigned by the DCI/DDCI:

No tasks assigned during this reporting period.

2. Items or Events of Major Interest that have Occurred
During the Preceding Week:

a. LIMS

Booz-Allen & Hamilton (BAH) is in the process of
finalizing its design approach for the first work package
(WP1) which is scheduled to become operational in February
1985. Drafts of the WP1 documentation will be delivered to
the LIMS team 9 May, for government review and comment.
Upon completion of this review, BAH will be asked to make
any changes deemed necessary by the government and finalize
the documentation. This documentation will then be used to
conduct the Critical Design Review which is scheduled to
begin on 11 June 1985.

b. DAS

(1) As the result of a conversation with the
Chief/LSD/MISG/ODP on the subject of updating ASAPS, a form
930 was prepared and submitted to this organization to
enhance ASAPS and develop a Wang Alliance capability using
the enhanced version. This enhanced version will be
applied to PC developments where relevant.

(2) An improved version of the position
description that applies to the P&PD ADBA position has been
completed, after P&PD coordination. This version will be
used as a basis for other ADBA positions.

(3) A DAS Newsletter has been prepared and will
be mailed to incumbents of DAS-designated positions. This
replaces the need for periodic briefings on topics of
general interest where less than 100% attendance can be
expected.

c. Regulations - The following regulations were
written, reviewed, commented upon, concurred in, or
published during the past week:

Noncompetitive Procurements - Written in
conjunction with PMS and submitted to OIS/RCD.

Technical Group/DAS/IMSS/OL
WEEKLY STATUS REPORT
Week of 23 to 27 April 1984

I.   Major Activities During the Past Week·

A. Support to OL:

     COMIF (Contract Information System). The AM/ADD procedure
was modified to correct a "value too large for the hold file"
error. A hold statement that was being built would sometimes have
so much data loaded into it that GIMS could not process the
statement and the procedure would abend. The modified procedure
is now being tested by the data base manager and should be loaded
STAT onto COMIF3 sometime this week. [   ] (U)

II. General Items:

     None to report.

III. Problems·

A. Support to OL:

     ICS (Inventory Control System). Processing of the ICSGAS
Procedure continues to fail on the ACT extract due to users being
on the data base during execution. All parties involved are
reviewing several alternatives to resolve these problems and will
meet early next week to decide upon which one to implement.
STAT [   ] (U)

IV. Upcoming Events:

     None to report.
